

# Number Resource Policy Development Activities

**Louie Lee**

Chair, ICANN ASO Address Council

ICANN 39

Cartagena, Colombia

8 December 2010

- 1. About the ASO: MoU, Global Policy, Address Council**
- 2. RIR PDP: Principles, Roles, Basic Steps**
- 3. Global Process: Overview, Statistics, “Global Coordinated Policy”**
- 4. IANA Update**
- 5. NRO Update**
- 6. Mitigating the Effects of IPv4 Exhaustion**
- 7. Global Number Policy and Global Proposals**
- 8. Regional Activities: AfriNIC, APNIC, ARIN, LACNIC, RIPE**
- 9. Closing: Questions and Answers, How to Participate**

*Please ask questions at the end of each section.*

## ASO MoU (dated 21 October 2004)

- Agreement between ICANN and the Numbering Resource Organization (NRO)
- NRO fulfills the role of the ASO
- The NRO Number Council fulfills the role of the ASO Address Council
- Defines the Global Policy Development Process (PDP) as a 15-step process
  - From proposal through adoption by the ICANN Board
  - Based on the RIR's PDPs... “...the global policy proposal [will] be placed on the agenda for next open policy meeting in each region, in accordance with the applicable policy process...”

## Global Policy

- “Global policies are defined within the scope of this agreement as Internet number resource policies that have the agreement of all RIRs [Regional Internet Registries] according to their policy development processes and ICANN, and **require specific actions or outcomes on the part of IANA** or any other external ICANN-related body in order to be implemented.”\*
- For the most part global proposals/global policies determine number allocation policy for requests from the RIRs to the IANA (RIRs receive their number resources from IANA)

*\*Defined in the ASO MoU (dated 21 October 2004)*

**Comprised of 15 elected and appointed individuals from all 5 regions**

**Independent body separate from RIR management and board to:**

1. Oversee global policy development
2. Appoint 2 ICANN Board of Directors
3. Serve on ICANN bodies:  
NomCom, AoC Review Teams
4. Advise ICANN Board on number resource matters

## **Open Forum**

- Open Policy Mailing List
- Open Policy Meetings

## **Transparent**

- PDP documented
- Policies documented
- Meetings documented

## **Bottom Up**

- Consensus-based
- RIRs do not dictate policy, they implement

## **Community**

- Submit policy proposals
- Discuss policy proposals (in favor or not?)

## **Consensus Evaluator**

- Determine consensus

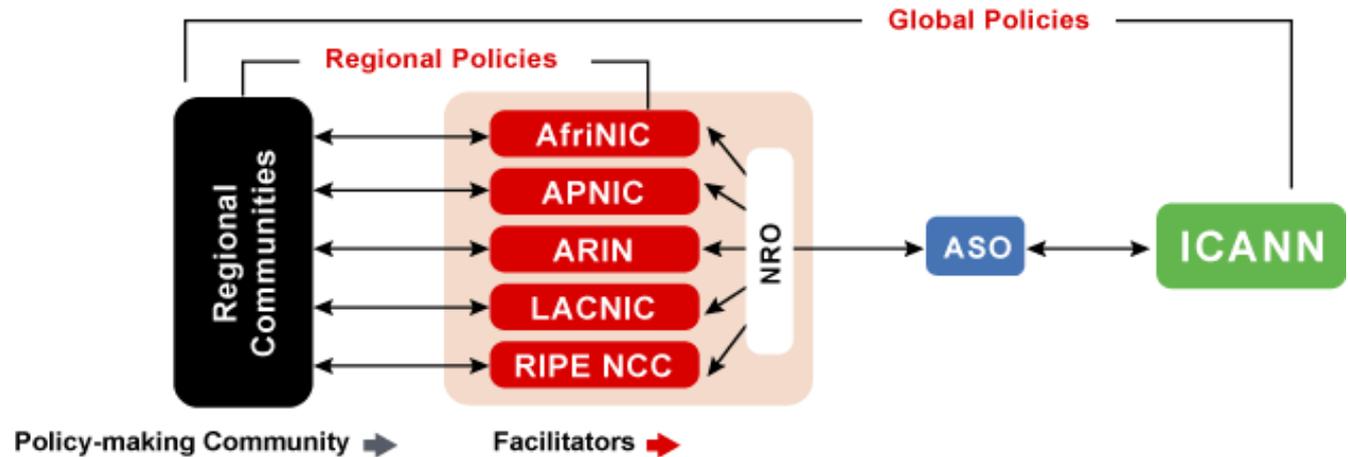

## **Board**

- Provide fiduciary and process oversight
- Ratify policy

## **Staff**

- Conducts assessments of proposal impacts
- Implement ratified policy

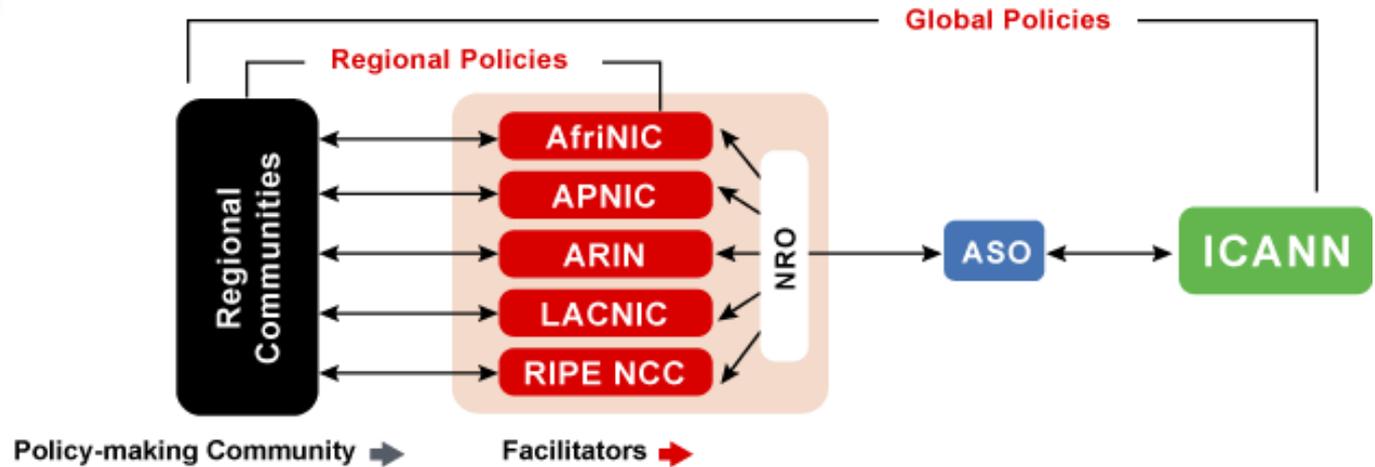

- 1. Community individuals and groups submit a proposal**
- 2. Community discusses the proposal on the mailing list**
- 3. Community discusses the proposal at an open policy meeting**
- 4. Consensus evaluation**
- 5. Last Call**
- 6. Adoption**
- 7. Implementation**

**Global proposal discussed/presented at all 5 RIRs per their PDPs**

- ASO AC members follow and participate in discussions

**After adoption by all 5 RIRs proposal forwarded to the ASO AC**

## ASO AC Proposal Review

- Process (RIR PDP) review
- Common agreement among RIRs on common text
- Adequate consideration of viewpoints

**ASO AC forwards proposal to ICANN Board for adoption**

**ICANN Board adopts, and IANA implements**

## **8 Global Proposals (since 2001)**

- Adopted and implemented as policy = 6
- Under discussion = 1
- Did not become a global policy = 1

**Details of these policies/proposals in later presentation**

**<http://nro.net/policy/index.html#regional>**

## Review

- Global Proposal
  - Policy about IANA and RIRs
- RIR Proposal
  - Policy about RIRs and their customers

## Globally coordinated proposal

- Same proposal discussed/presented at each of the RIRs
- Normally the goal is to have the same policy worldwide
  - Processed as normal RIR proposals without triggering action by IANA
  - Examples include original IPv6 allocation policy and transition policy to 4-byte AS numbers

# IANA Status Update

*ICANN, Cartagena*

*Elise Gerich*

*VP, IANA*

*December 2010*

# Overview

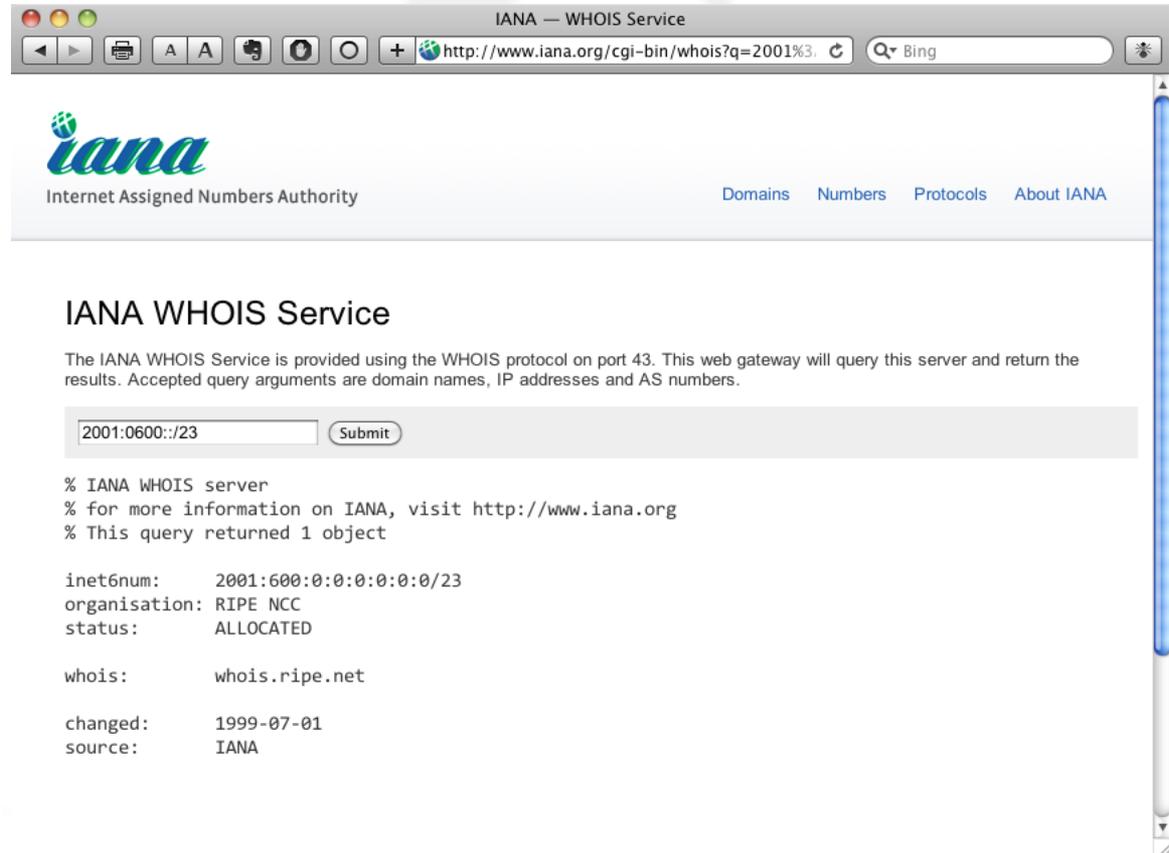

Internet Assigned Numbers Authority

- New IANA Whois Server
- IDN ccTLDs
- AS Numbers Global Policy
- IPv4 Status
- In other news... multicast

# A new whois.iana.org

It now provides responses for:

- Unicast IP addresses
- Multicast registrations
- AS Numbers
- DS records

The screenshot shows a web browser window titled "IANA — WHOIS Service". The address bar contains the URL "http://www.iana.org/cgi-bin/whois?q=2001%3". The page features the IANA logo and navigation links for "Domains", "Numbers", "Protocols", and "About IANA". The main content area is titled "IANA WHOIS Service" and includes a brief description of the service. Below this is a search form with the input field containing "2001:0600::/23" and a "Submit" button. The results are displayed in a text-based format:

```
% IANA WHOIS server
% for more information on IANA, visit http://www.iana.org
% This query returned 1 object

inet6num:      2001:600:0:0:0:0:0/23
organisation:  RIPE NCC
status:        ALLOCATED

whois:         whois.ripe.net

changed:       1999-07-01
source:        IANA
```

# AS Numbers Global Policy

The policy allows each RIR to maintain 2 separate pools of AS Numbers until the end of 2010

- The ASO AC sent a proposal (ripe-496) to the ICANN board
- The public comment period ended on 13 August
- The proposal was ratified in September and is now policy

# IPv4 Status 2010

- 19 /8s have been allocated so far this year
- 8 have been allocated to APNIC
- ARIN & RIPE NCC have each received 4
- LACNIC has received 2
- AfriNIC has received 1

# IPv4 Status 2010

About 3% of total IPv4 space left in the pool.

This equals approximately 100 Million unique addresses.

- 7 unallocated /8s remain
- 2 will be allocated under the global policy that was ratified in 2005
- Then the last 5 blocks will be allocated simultaneously as per the special global policy ratified in 2009

# In other news... multicast

1st 24 bits of unicast  
address

234

- draft-ietf-mboned-ipv4-uni-based-mcast-06 approved
- Everyone with a /24 of IPv4 unicast space has also has a multicast /32
- 234/8 is used for this algorithmic assignment mechanism

# In other news... multicast

- We are introducing an annual review process for multicast address assignments
- We'll be updating registrant names and contact information as appropriate

Registrant name	<input checked="" type="checkbox"/>
Contact name	<input type="checkbox"/>
Address	<input type="checkbox"/>
Still required?	<input type="checkbox"/>

Thank you

Number Resource Organization

## IPv4 activities

- Transfer policies
  - Between organizations within a region
  - Between RIRs
- Soft landing policies
  - Setting aside special-use address blocks for transition mechanisms (e.g. NAT, infrastructure)
  - Reducing maximum size address blocks to be allocated
- Return to and redistribution by IANA – Global policy
  - Allows IANA to receive address space from the RIRs
  - Allows IANA to allocate space back to the RIRs

## IPv6 activities

- Remove certain requirements for obtaining space directly from RIRs
- Add alternate means of justification
- IPv6 education and outreach

## Overall education and outreach

- In-person outreach: industry conferences, conventions, ISOC events, etc.
- Online education: “how-to”s, compatibility lists, etc.

---

**Break....**

# Global Number Policy and Global Proposals

**Louie Lee**

Chair, ICANN ASO Address Council

### **Criteria for Establishment of New Regional Internet Registries (ICP-2\* “Internet Coordination Policy”)**

- Adopted by ICANN Board per ASO AC recommendation on 4 June 2001
- October 2002 LACNIC was recognized by ICANN as an RIR
- April 2005 AfriNIC was recognized by ICANN as an RIR

### **Global policy on IANA Allocation of IPv4 address space to the Regional Internet Registries**

- IPv4 allocations from IANA to the RIRs (unit is /8s, 18-month needs)
- Adopted by ICANN Board per ASO AC recommendation on 8 April 2005

### **Global Policy for Allocation of IPv6 Address Space**

- IPv6 allocations from IANA to the RIRs (unit is /12s, 18-month needs)
- Adopted by ICANN Board per ASO AC recommendation 7 September 2006

\*ICP-1 and ICP-3 are DNS policies

## **Global Policy for Allocation of ASN Blocks to Regional Internet Registries**

- Autonomous System Numbers allocations from IANA to the RIRs (unit is blocks of 1024 AS numbers)
- Adopted by the ICANN Board per ASO AC recommendation 31 July 2008

## **Global Policy for the Allocation of the Remaining IPv4 Address Space**

- The last five /8s are reserved, one /8 per RIR from the IANA at the end
- Adopted by the ICANN Board per ASO AC recommendation on 6 March 2009

## **Global IANA Policy for Allocation of ASN Blocks to RIRs**

- Modified the global ASN policy to allow IANA to process separate 2-byte and 4-byte requests through 2010.
- Adopted by the ICANN Board per ASO AC recommendation on 22 July 2010

## **Global Policy for Allocation of IPv4 Blocks to RIRs (2009/2010 timeframe)**

- Passed in 5 RIRs, but passed in one with revised text
- Does not meet the criteria to be advanced by the NRO EC to the ASO AC in its current state

### **Global Policy for IPv4 Allocations by the IANA Post Exhaustion**

- Allows IANA to receive address space from the RIRs
- Allows IANA to allocate space back to the RIRs
- Status: (Slightly different versions are under discussion)
  - AfriNIC – Discussed/presented and sent back to the list for more discussion
  - APNIC – Discussed/presented and sent back to the list for more discussion
  - ARIN – Recommendation to adopt (revised, Nov. 2010)
  - LACNIC – Discussed/presented and sent back to the list for more discussion
  - RIPE – Discussed/presented and sent back to the list for more discussion

---

# AfriNIC Policies and Proposals

**Alan Barrett**

AfriNIC representative, ICANN ASO Address Council

**Anybody can propose a policy**

**Discussion on Resource Policy Discussion mailing list**

- Anybody can participate

**Discussion at public policy meeting**

- Two meetings per year

**Consensus**

**Last call on mailing list**

**Ratification by Board**

## **IPv4 Soft Landing Proposal (AFPUB-2010-GENv4-005)**

- Deals with IPv4 after the last /8 block is allocated by the IANA
- Going to Last Call

## **Global Policy for IPv4 Allocations by the IANA Post Exhaustion (AFPUB-2010-v4-006)**

- Under Discussion

## **IANA Policy for Allocation of ASN Blocks to RIRs (AFPUB-2009-ASN-001)**

- Global policy, dealing with the transition from 16-bit to 32-bit AS numbers
- Adopted

## **Policy Development Process (AFPUB-2010-GEN-005)**

- Minor changes to the policy development process
- Adopted

## **Abuse Contact Information (AFPUB-2010-GEN-006)**

- Making it easier to report abuse
- Going to Last Call

## **Addition of Real Contact Email into ASN Whois Bulk Data (AFPUB-2010-GEN-007)**

- Changing the way email addresses are published
- Under Discussion

## **View policies and proposals on web page**

- <http://www.afrinic.net/policy.htm>

## **Discuss on Resource Policy Discussion mailing list**

- <https://lists.afrinic.net/mailman/listinfo.cgi/rpd>

## **Discuss at Public Policy Meetings**

- Next meeting is in Dar es Salaam, Tanzania, 4 to 9 June 2011

## **Open to everybody**

- You do not need to be a member of AfriNIC
- You do not need to live in Africa

**Thank you**

**Alan Barrett**

apb@cequrux.com

AfriNIC representative, ICANN ASO Address Council

# APNIC Policies and Proposals

**Naresh Ajwani**

APNIC representative, ICANN ASO Address Council

## **Removed IPv4 prefix exchange policy**

- Permits resource holders to exchange three or more non-contiguous IPv4 blocks in return for a single, larger, contiguous block

## **Removed aggregation requirement from the IPv6 initial allocation policy**

- Reduces overall requirements to obtain IPv6 addresses
- Other RIR communities are discussing removing aggregation requirements from their policies
- Implemented July 2010

## **Removed Abuse contact information**

- Mandatory reference to IRT objects in the inetnum, inet6num, and aut-num objects in the APNIC Whois Database

## **Distribution of IPv4 addresses once the final /8 period starts**

- To handle any IPv4 address space received by APNIC after the final /8 policy

## **Eligibility for critical infrastructure assignments from the final /8**

- Each account holder to request & receive a single assignment from the remaining /8 worth of space

## **Global Policy for IPv4 Allocations by the IANA Post Exhaustion**

## **IPv6 address allocation for deployment purposes**

- Adds alternative criteria for receiving larger than /32 initial IPv6 during deployment phase.

## **Alternative criteria for subsequent IPv6 allocations**

- Account holders with existing IPv6 allocations to receive subsequent IPv6 allocations for use in networks that are not connected to the initial IPv6 allocation.

**Frequent whois information update request**  
– Accuracy of Member's database.

**For more information about APNIC's  
activities, please see:**

**<http://www.apnic.net/policy>**

# Next APNIC Open Policy Meeting APNIC 31

## Thank You!

# ARIN Policy and Proposals

**Martin Hannigan**

ARIN representative, ICANN ASO Address Council

## **IPv4 Equitable IPv4 Run-Out (2009-8)**

- Reduces the size of allocations to providers after ARIN receives its last /8

## **/24 End User Minimum Assignment Unit (2010-2)**

- Makes it easier for end users to get IPv4 address space (/24s)

## **IPv6 for Community Networks (2008-3)**

- Makes it easier for community networks to request IPv6 space

## **IPv6 Multiple Discrete Networks (2009-5)**

- Makes it easier for providers to request multiple/additional IPv6 allocations

## **Rework of IPv6 allocation criteria (2010-4)**

- Makes it easier for providers to get initial IPv6 allocations

## **POC Validation (2008-7)**

- Helps to increase the accuracy of POC records

## **Simplified M&A transfer policy (2010-6)**

- Makes it simpler to accomplish M&A transfers
- Reiterates that unused space must be returned to ARIN

## **IANA Policy for Allocation of ASNs to RIRs (2009-6)**

- Extends IANA's ability to process separate 2-byte and 4-byte ASN requests for the RIRs through 2010

## **Rework of IPv6 assignment criteria (2010-8)**

- Makes it easier for end users to obtain larger portions of IPv6 address space
- Last call

## **IPv6 Subsequent Allocation (2010-12)**

- Makes it easier for providers to obtain additional IPv6 address space (eg. for 6rd)
- Moving towards adoption

## **Global Policy for IPv4 Allocations by the IANA Post Exhaustion (2010-10)**

- Allows returns to IANA and allows IANA to issue smaller blocks to the RIRs
- Moving towards adoption

## **Globally Coordinated Transfer Policy (PP 119)**

- RIR to RIR transfers
- “Any RIR's resource registrant may transfer IPv4 addresses to the resource registrant of another RIR as long as the two RIRs agree and exercise Internet stewardship and the values expressed in RFC 2050.”

## **Protecting Number Resources (PP 120)**

- IPv4 reclamation
- “ARIN shall use any reasonable and practical methods to proactively look for fraudulently obtained or abandoned number resources and seek the return of those resources to ARIN.”

## **Sensible IPv6 Allocation for ISPs (PP 121)**

- Current policy means many requests for /32s.
- Easier to get larger IPv6 allocations (nibble boundaries)

## **Reserved Pool for Future Policy Development (PP 122)**

- Current policy reserves an IPv4 /10 to facilitate IPv6 deployment (when ARIN gets its last /8).
- Keeps the /10 reserved, but more discussion needs to happen to decide how to use it.

## **Reserved Pool for Critical Infrastructure (PP123)**

- Reserves an IPv4 /16 for critical infrastructure (exchange points, TLD servers, etc.).

## Clarification of Section 4.2.4.4 (PP 124)

- Currently ISPs can request a 12-month supply of IPv4 address space. At the moment ARIN gets its last /8, supply period reduced to 3-months.
- Grandfathers in process requests (lets them get 12-month supply)

## Efficient Utilization of IPv4 Requires Dual-Stack (PP 125)

- Current policy does not require dual-stack.
- Portion of policy text, “All new IPv4 addresses assigned, allocated or transferred to an organization must be deployed on dual-stacked interfaces along with IPv6 addresses.”

---

# Thank you

**Martin Hannigan**

[marty@akamai.com](mailto:marty@akamai.com)

ARIN representative, ICANN ASO Address Council

# LACNIC Policy and Proposals

Francisco Obispo  
ICANN ASO Address Council

## **LAC-2007-01 Modifications to the IPv6 Prefix Initial Allocation Policy**

- The proposal consisted on eliminating the requirement of announcing an IPv6 without the possibility of disaggregation.
- Approved and ratified by the board.

## **LAC-2009-04 Transfers of IPv4 Blocks within the LACNIC Region**

- This proposal enables and defines the rules for performing IPv4 address block transfers between ISPs or end users within the LACNIC region.
- Approved and ratified by the board.

## **LAC-2009-09 Modification: 2.3.3.3. Direct Allocations to Internet Service Providers**

- To allow ISPs to obtain blocks of their own in those cases that require establishing interconnections with other providers.
- Didn't reach consensus. Was presented again at LACNIC XIV.

## **LAC-2010-05 Initial allocation and assignment of IPv4 addresses for ISPs**

## **LAC-2010-06 Assignment to End Users with need of interconnection**

- To update the “Multihoming” requirement with a more flexible one like “Interconnection Needs”.
- Consensus reached

## **LAC-2010-04 Global Policy for IPv4 Allocation by the IANA post exhaustion**

- This is a proposal to create a policy allowing for the allocation of IPv4 address space after the depletion of the IANA IPv4 address pool.
- Returned to discussion by Policy Forum chairs. Requires more discussion

## **LAC-2010-01 One Public Policy Forum Chair per linguistic community**

- That the Public Policy Forum be moderated by three chairs, each belonging to one of the linguistic communities corresponding to LACNIC's three working languages: Spanish, Portuguese and English.
- Didn't reach consensus. Was abandoned by the proposer.

## **LAC-2010-02 Election of Chairs through electronic mechanisms**

- To change the process for electing Public Policy Forum Chairs so that they are elected by electronic means and later ratified by those in attendance at the Public Policy Forum.
- Approved and ratified by the board.

## **LAC-2010-03 Inclusion of ASN in the whois when available**

- Inclusion of origin ASN (provided that it is available) in the information of WHOIS of all the LACNIC's received prefixes.
- Consensus reached

### **Public policy mailing list.**

[https://mail.lacnic.net/mailman/listinfo/politic  
as](https://mail.lacnic.net/mailman/listinfo/politic<br/>as)

### **List is totally open**

**In order to submit a policy, you first have to  
subscribe to the list**

**Proposals must be submitted using the

# RIPE Policies and Proposals

**Wilfried Woeber**

RIPE representative, ICANN ASO Address Council

## **Run Out Fairly (2009-03)**

- IPv4 address space will be allocated/assigned based on a decreasing allocation/assignment period
  - 9 months (now)
  - 6 months (from January 2011)
  - 3 months (from July 2011)

## **80% Rule Ambiguity Cleanup (2010-04)**

- clarification of the '80% rule' for sub-allocation requests
- 80% of the utilisation ratio is calculated on all the already allocated space

## **Direct Assignment to End User from the RIPE NCC (2007-01)**

- Defines mandatory for IPv4 assignments the contractual relationship between End Users and IR (LIRs or RIPE NCC)

## **IANA Policy for Allocation of ASNs to RIRs (2009-07)**

- IANA and the RIRs will operate ASN allocations from an undifferentiated 4-byte ASN allocation pool from 1 January 2011

## **Temporary Internet Number assignment Policies (2010-01)**

- Collects under only one policy section all the rules for temporary assignments
- Last call

## **Allocations from the last /8 (2010-02)**

- Defines the distribution of IPv4 address space from the final /8 available
- Last Call

## **Global Policy for IPv4 Allocations by the IANA Post Exhaustion (2010-05)**

- Some changes to the text were presented at RIPE 61
- The new text is available and will enter the PDP

## **Registration Requirements for IPv6 End User Assignments (2010-06)**

- Creates an improved and structured registration in the RIPE database for multiple IPv6 sub-allocation
- Will enter the Review Phase with the new proposal version

## **Ambiguity Cleanup on IPv6 Address Space Policy for IXP (2010-07)**

- Clarifies the conditions for an IXP to receive IPv6 allocations
- Will enter the Review Phase

## **Abuse Contact Information (2010-8)**

- Defines rules to improve the registration and the availability of the abuse contact data in the RIPE database
- Discussed at RIPE 61, proposal text will be revised

## **Globally Coordinated Transfer Policy**

- Presented by authors at RIPE 61
- Plans to start the PDP

---

# Thank you

**Wilfried Woeber**

Woeber@CC.UniVie.ac.at

RIPE representative, ICANN ASO Address Council

# Closing: Questions and Answers

**Louie Lee**

Chair, ICANN ASO Address Council

### **Watch the ASO AC site for news about new global proposals**

- <http://aso.icann.org/>

### **Participate in the Policy Discussions in your RIR region**

- Global proposals are discussed on the RIR's policy mailing lists and at open policy meetings
- Subscribe and participate on the appropriate list and attend open public policy meetings (remote participation enabled)
  - Open, no membership requirements
  - State your opinion

## Subscribe to the RIR policy list(s)

- No membership requirements

## Attend RIR meetings

- In person (open, nominal fee)
- Remote (free)

**Internet Number Resource Policy Development: Participation is Easy!**

**NRO**

The Number Resource Organization (NRO) encourages all stakeholders to get involved and participate in the development of Internet number resource policy. These policies govern how the Regional Internet Registries (RIRs) distribute and manage IPv4 and IPv6 address space and Autonomous System Numbers.

<http://nro.net/about/rirs.html>

RIR policy forums are open to everyone. Anyone can propose a policy or argue for or against a policy proposal, so everyone's voice can be heard. All policy proposals, discussions, and debates are conducted publicly on email lists and at open policy meetings. Decisions are based on the consensus of all participants. There are several ways to get involved:

- 1. Read the Policy Proposals Under Discussion**  
Proposals are available for anyone to read. To find out what's currently under discussion in your region, see:  
Afrinic - <http://www.afrinic.net/policy.htm>  
APNIC - <http://www.apnic.net/policy/proposals>  
ARIN - <https://www.arin.net/policy/proposals>  
LACNIC - <http://lacnic.net/en/politicas>  
RIPE NCC - <http://www.ripe.net/ripe/policies/proposals>
- 2. Discuss Policy Proposals on RIR Mailing Lists**  
Each RIR maintains an open mailing list devoted to the discussion and development of the policies in its region. No membership is required.  
Afrinic - <https://lists.afrinic.net/mailman/listinfo/cgi/rpd>  
APNIC - <http://mailman.apnic.net/mailman/listinfo/sig-policy>  
ARIN - <http://lists.arin.net/mailman/listinfo/arin-ppml>  
LACNIC - <https://mail.lacnic.net/mailman/listinfo/politicas>  
RIPE NCC - <http://www.ripe.net/mailman/listinfo/address-policy-wg>
- 3. Attend RIR Public Policy Meetings**  
Each RIR hosts regular open policy meetings where anyone interested in number resource policy can meet to discuss policy issues, share technical knowledge and best practices, and collaborate on solutions to maximize the growth and utility of the Internet. Remote participation options are also widely available.  
<http://nro.net/meetings>
- 4. Propose a Policy Idea**  
Internet number resource policy development starts when people just like you see a way that Internet number resource management and distribution could be improved. If you have an idea, contact your local RIR to find out more about how you can submit your idea for community consideration.

Your participation is a critical part of the continued success of the bottom-up policy development process and the sustained growth of the Internet. By staying actively involved, participants define how RIRs distribute the Internet number resources that organizations need for their networks and their customers, thereby ensuring the health and success of the Internet into the future and beyond.

**NRO**

**REGIONAL INTERNET REGISTRIES (RIRs)**  
RIRs register and distribute Internet number resources (IPv4 and IPv6 address space and Autonomous System Numbers), provide tools and services to their local Internet communities and work together on joint projects as the Number Resource Organization (NRO).

**THE RIRs:**

- ▶ Provide technical coordination and management of Internet number resources
- ▶ Participate in Internet community meetings and events
- ▶ Operate as autonomous, not-for-profit membership-based organizations
- ▶ Facilitate policy development by their members and the Internet community via open meetings and mailing lists

**WWW.NRO.NET**

**NRO**

**WHAT IS THE NRO?**  
The Number Resource Organization (NRO) is the coordinating body for the five Regional Internet Registries (RIRs).

**THE NRO:**

- ◁ Protects the unallocated Internet number resource pool
- ◁ Promotes and protects the bottom-up policy development process
- ◁ Acts as a focal point for Internet community input into the RIR system

**WWW.NRO.NET**

**NRO**

**are::you:IPv6:ready?**

**ASSESS YOUR NEEDS** Your deployment plan should address the specific needs of your organization and customers.

**SET A TIMETABLE** Factor IPv6 deployment into your current IT upgrade cycle. Actively engage your vendors and suppliers and ensure they are aware of your needs.

**APPLY FOR IPv6 ADDRESSES** Get IPv6 address space for your network. Contact your RIR or upstream provider to find out more.

**WWW.NRO.NET**
