ASO/AC Activities: Meetings

- 5 meetings after APNIC36
  - Teleconferences
    - Regular:
      - 2 October 2013, 6 November 2013, 4 December 2013, 8 January 2014 and 5 February 2014

ASO/AC Activities: Global Policy Management

- There are currently no Global Policy Proposals

- A Global Policy

  - "Global policies are defined within the scope of this agreement as Internet number resource policies that have the agreement of all RIRs [Regional Internet Registries] according to their policy development processes and ICANN, and require specific actions or outcomes on the part of IANA or any other external ICANN-related body in order to be implemented."

  - Global policies determine number allocation policy for requests that involve IANA

  - Global policies may also specify regional number allocation policy

Global Policy Development

- Each region has its own policy development process
  - All open, transparent, and bottom-up
- Global policy proposals are submitted in all 5 regions
- Each region follows its own process
- It then gets passed to the NRO for review
- And forwarded to the ICANN board

Consultation on the Implementation of Global Policy

- Interpretation of the Global Policy for Post Exhaustion IPv4 Allocation
  - https://www.icann.org/en/resources/policy/global-addressing/allocation-ipv4-post-exhaustion
  - The global policy defines states that "Allocations from the IANA may begin once the pool is declared active." It is not clear whether this means that allocation from the Recovered IPv4 Pool should be
    - made straight away, or
    - whether they should happen at the start of the next "IPv4 allocation period," the "6-month period following 1 March or 1 September."

ASO/AC is now collecting community inputs.
